Blood Drive

Sunday, August 27 in the FLC gym.

We are having a blood drive on Sunday, August 27 in the gym from 8am to 2pm. [Sign up](#) today!

*Four unexpected benefits of donating blood:
(excerpt from Health.com)*

work

Your iron levels will stay balanced

Healthy adults usually have about 5 grams of iron in their bodies, mostly in red blood cells but also in bone marrow. When you donate a unit of blood, you lose about a quarter of a gram of iron, which gets replenished from the food you eat in the weeks after donation. This regulation of iron levels is a good thing, because having too much iron could be bad news for your blood vessels.

You could live longer

Doing good for others is one way to live a longer life. A study in *Health Psychology* found that people who volunteered for altruistic reasons had a significantly reduced risk of mortality four years later than those who volunteered for themselves alone.

Your blood may flow better

Repeated blood donations may help the blood flow in a way that's less damaging to the lining of the blood vessels and could result in fewer arterial blockages.

You'll get a mini check up

Before you give blood, you'll first have to complete a quick physical that measures your temperature, pulse, blood pressure, and hemoglobin levels. After your blood is collected, it's sent off to a lab where it will undergo 13 different tests for infectious diseases, like HIV and West Nile virus. If anything

comes back positive, you'll be notified immediately.
